Conservancy Receives Default Judgment For BusyBox GPL Enforcement

Software Freedom Conservancy received a [default judgment on 27 July 2010 against Westinghouse \(PDF\)](#) in Conservancy's ongoing lawsuit against many GPL violators of BusyBox's copyrights.

This order of default judgment marks the first time a court in the USA has granted an injunction ordering a GPL violator to permanently cease distribution of out-of-compliance GPL'd software.

Conservancy is proud to provide GPL enforcement services to its member projects. These enforcement services complement the many other non-profit management and organizational services Conservancy also provides to its many member projects.
